

Dear Ingestre Stables,

Thank you for having me and IRC for ten days, and teaching us so much about horses and horse riding! I wanted to give some feedback of what things we did, or which teachers we liked the most.

My favourite horse is called Sox, although he lives outside, and I don't usually get to see him, I still love how he is so obedient, when you want him to go forward, he does, and when you want him to halt, or go slower, he does! And he has really good stable manners, lets me pet him, and doesn't mind if i groom him. I learnt that I should be more careful with my half halt, and to be in more control when Sox goes a little too quick.

My favourite instructor for the riding lesson was Kate, because she was nice, but at the same time knew how to teach me so that I would take more risks, and still be safe. My favourite way of teaching that she used was that she taught us as individuals, and so much as a group.

Now my favourite stable management teacher was Jessica because she asked us about the horses points of the body while we were grooming the horses, and the information I learnt from her, was very useful later on, in Alex's stable management lesson.

Also, she was really kind and whenever we asked her a question, she would show us how to do it, then she would do the part that was the hardest, then let you do the easy part. I thought that that helped me get over my fear picking out the back hooves because she proved to me how easy it was, and from that day on, I could pick up and pick out a hind leg hoof without problems.

I learnt much more from other instructors and animals, and had a good time too, but these were the ones that mattered the most. Thanks again! I hope I can come back next year with my family!
